MAKING SPORT ACCESSIBLE

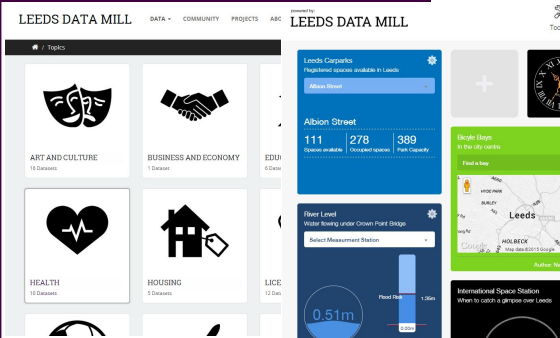

Check out the latest interactive visualisation showcasing a clever way of providing lots of information in a simple and practical way.

Hovering over a sports centre will highlight the classes it runs and hovering over a class shows you which sports centres run it.

For the full article visit and access to the visualisation:

LEEDS DATA MILL/DASHBOARD

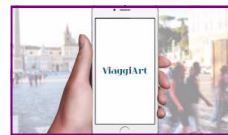

You may have noticed a few changes on Leeds Data Mill. We recently re-launched the site to make it more user friendly, easier on the eye and better to navigate with an improved search function. Other changes include:

- A tool which automatically checks the quality of uploaded CSV files
- A link and visualisation the Open Data Institute certificate highlighting the quality of the dataset
- An inventory of all published datasets, created at a touch of a button
- An improved requestor tool for queries and issues

Added to these changes, you'll notice the launch of the Leeds Data Mill dashboard. These stories provide useful information using data from Leeds Data Mill. The dashboard will be enhanced very soon to allow us to all to create our own stories. Watch this space....

VIAGGIART LEEDS APP

An app to help people explore the culture of Leeds is launching in the city—the first pilot project outside of Italy. The ViaggiArt web platform and mobile app is already in use in Italy and provides information about cultural sites. The app has been developed using information on Leeds Data Mill.
